

## i80 heating thermostat i80.723

LCD display thermostat, you can choose manual mode or energy saving control mode. Electric drive valve control for water heating

### Technical Parameters

- Power supply voltage: AC220V 50HZ static power <1.5W
- Terminal Blocks: single terminal can connect up to 2 \* 1.5mm or 1 \* 2.5mm wires
- Temperature control range: 5-90°C
- Temperature limit range: 16-60°C
- Working environment: -10-55°C
- Protection class: IP20
- RS485 communication: MODBUS protocol
- Resistive load: 3A

## i80 Air conditioner thermostat i80.42

It is suitable for two-pipe central air-conditioning fan coil system. By controlling the wind speed of the fan coil and the opening and closing of the electric valve, the indoor temperature can be adjusted

### Technical Parameters

- Input voltage: AC220V 50HZ
- Load current: max 3A
- Rated power: <1.5W
- Terminal Blocks: single terminal can connect up to 2 \* 1.5mm or 1 \* 2.5mm wires
- Temperature control range: 5-35°C
- Working environment: -10-55°C
- Protection class: IP20
- RS485 communication: MODBUS protocol
